

Internship Exchange Program

Internship programs at K J Somaiya College of Education are specially delineated to allow foreign teacher education colleges and university students to come to Mumbai, a city in India to gain exposure to Indian culture and its diverse linguistic and ethnic background. To understand Indian concerns and challenges to education and thereby get hands-on experience in formulating some innovative teaching strategies and practices to overcome the concerns and foster academic understanding of the content among the Indian students. This experience will enrich the foreign students to cater to the diverse group of students coming from multi religious and lingual backgrounds which would further equip them in catering to similar problems and concerns of students in their classrooms.

Internship is one of the important areas of B.Ed and M.Ed. As both the under graduate and postgraduate teacher education programs are for two years, internship is spread across the two years in different time periods. We try to give the best exposure of internship to our student teachers by arranging internship facilities in reputed schools. Ranging from SSC to CBSE. The list of internship schools are as below-

Datta Meghe World Academy High School- CBSE

Phoenix International School- CBSE

SVDD- SSC

Dashmesh-SSC

Christ Academy High School- CBSE

S.K. Somaiya Vinay Mandir Junior College

D J Doshi Gurukul English Medium High School-SSC

Saraswati High School- SSC

Apart from the above mentioned Mumbai Schools we also offer internship program at our rural schools-

K. J. Somaiya Nareshwadi School, Dahanu.

K.J. Somaiya English Medium School, Sameerwadi.

Somaiya Vinay Mandir School, Laxmiwadi

To enable our students to understand the work culture both in rural and urban areas and critically try to find solutions to the unique problems of the rural students. Rural students generally lack English proficiency and understanding the difficult concepts of Science and Maths. This is the reason we send our best students to such areas. The research proves that the low standard of achievement of students is more because of less skilled teachers rather than their economic and social conditions.

The Internship exchange program is crafted with the aim to allow Indian as well as abroad students to gain professional experience as well as in-depth exposure to a foreign culture and society.
